Wild Hacks Northwestern Hackathon
- *Best Sustainability Hack*

Hack UTD Hackathon

Boilermake X Purdue Hackathon

EMPLOYMENT HISTORY

Storage Stats, *Prospect Heights., IL*
CTO & Co-founder   **Nov. 2024 – Present**
- Architected and implemented a SaaS platform from concept to deployment, leading ongoing system optimization and maintenance to ensure 99.9% uptime on the AWS infrastructure.
- Designed and developed a robust back-end infrastructure with the Symfony PHP framework, incorporating caching strategies and database optimization.
- Built a comprehensive React.js front-end with integrated data visualization libraries (Rechart, MapBox), delivering complex data insights through interactive graphs.

Replient, *Lincolnshire, IL*   **Feb. 2023 - Dec. 2024**
Lead Software Engineer
- Managed a team of 4+ developers working on high-profile projects.
- Designed and developed end-to-end web applications using React, Node.js, Symfony, Twig, and VanillaJS technologies.
- Designed and implemented scalable software for distinguished clients.
- Conducted code reviews and provided mentorship to junior developers.
- Collaborated with cross-functional teams to deliver high-quality products.

ULINE, *Pleasant Prairie, WI*
Software Engineering Intern   **June 2023 – Aug. 2023**
- Developed and implemented automated testing protocols for critical e-commerce systems, significantly improving code reliability.
- Led comprehensive code cleanup initiatives across legacy store applications, modernizing the codebase while maintaining functionality.
- Established standardized testing practices that were adopted across the development team.
- Collaborated with senior developers to optimize ULINE's online retail platform.

Darpet Doors & Trim, *Franklin Park, IL*
Web Administrator   **Mar. 2022 – Feb. 2023**
- Managed and optimized the company's Shopify e-commerce platform, developing custom extensions and integrations to enhance site functionality and improve customer experience.
- Implemented comprehensive security protocols to protect sensitive customer data.
- Integrated the Shopify platform with Quickbooks to automate the ordering process.

NOTABLE PROJECTS

TalentCraft Portal

The TalentCraft Portal is a sophisticated data management hub for TalentCraft, a leading recruiting agency. It enables efficient organization, analysis, and understanding of extensive client and recruit data. Providing real-time data access, the portal ensures well-informed, timely decisions. Centralizing all information enhances operational efficiency and supports strategic decision-making, contributing to TalentCraft's success in matching top talent with the right opportunities.

C4 Human Resources Information System

Using Symfony and VanillaJS, this HRIS platform is a versatile and robust solution designed to streamline HR operations. It offers a wide range of functionalities including document editing, a file folder system, form creation, custom questionnaires, and more. This powerful platform efficiently provides HR teams with the tools they need to manage and organize data effectively, ensuring a seamless and productive workflow.

Marketing Dashboard

Developed a marketing automation system using the Symfony framework that enables mass text messaging to clients. The platform features a user-friendly interface for managing contact lists and scheduling automated marketing campaigns. Integrated SMS API service 'Twilio' to handle message delivery tracking and campaign analytics through a dashboard.
